

LITERATURE SCAN

- Simon Eidelman and I scan these journals:

European Physical Journal A
European Physical Journal C
Europhysics Letter
International Journal of Modern Physics A
JETP Letters
Journal of Experimental and Theoretical Physics
Journal of Physics G
Modern Physics Letters A
Nuclear Physics A
Nuclear Physics B
Physical Review C
Physical Review D
Physical Review Letters
Physics Letters B
Physics of Atomic Nuclei
Physics of Particles and Nuclei
Physics of Particles and Nuclei Letters
Physics Reports
Reviews of Modern Physics

- In addition, Simon scans:

Astroparticle Physics
Journal of High Energy Physics
New Journal of Physics
Physics–Uspekhi

- I don't scan for the mesons the Meson Team takes care of, and Simon doesn't scan for the *uds* baryon resonances I take care of.

- POSSIBLE ISSUES

Simon suggests that relevant parts of our encoding lists also go to the authors of reviews, so that there is not a disconnect between Data Listings and reviews. (I concur.)

Do we underscan (miss papers)? Do we overscan (list lots of extra papers)?

Most complaints of missing papers are about papers that appear in the several months between the last scanning deadline and publication of the Review. PLEASE CHECK IF THIS IS THE CASE BEFORE COMPLAINING TO US. It is up to encoders to decide how much late stuff to try to get in.
